PROFESSIONAL SUMMARY

Full Stack Developer and AI Automation Engineer with extensive experience in creating integrated business systems, ERP platforms, and workflow automations, I specialize in developing AI-powered assistants and operational tools tailored for both manufacturing and startup environments. Proficient in building scalable web applications using technologies such as Next.js, React.js, Node.js, Express.js, TypeScript, PostgreSQL, and MySQL, I effectively incorporate AI technologies like OpenAI, Gemini, Claude, n8n, and conversational AI systems to address real business challenges. Currently, I serve as an IT programmer at PT Dipa Pharmalab Intersains, where I design and implement internal manufacturing systems, operational dashboards, notification systems, and workflow automations that enhance daily business operations across various departments. My passion lies in creating AI-first products and intelligent automation systems that boost efficiency, improve decision-making, and enhance operational visibility, supported by a strong problem-solving mindset and a proven ability to translate real-world business issues into actionable technical solutions.

PROFESSIONAL EXPERIENCE

IT Programmer

PT Dipa Pharmalab Intersains — Majalengka, Indonesia | August 2025 – Present

- Design and develop internal manufacturing systems used across operational departments.
- Build ERP modules, operational dashboards, reporting systems, and production management tools.
- Develop AI-powered assistants integrated with company workflows and internal business data.
- Create automation workflows using n8n to reduce repetitive manual tasks and improve operational efficiency.
- Integrate notifications, reporting systems, and approval workflows through automated processes.
- Analyze operational problems directly with end users and convert business requirements into software solutions.
- Support system architecture planning, database design, deployment, maintenance, and infrastructure improvements.
- Collaborate with management and operational teams to optimize manufacturing workflows through technology.

Full Stack Developer & AI Automation Engineer

Criova — Remote | January 2026 – Present

- Build AI-powered business systems, automation platforms, and operational tools for internal company usage.
- Design and develop AI-assisted ERP workflows and intelligent business automation solutions.
- Develop integrations between AI services, workflow engines, databases, and operational platforms.
- Build conversational AI experiences and AI agents for operational support and business productivity.
- Implement automation pipelines using Hermes agent, n8n, and modern AI APIs.
- Participate in product architecture, feature planning, and AI integration strategy.

Full Stack Web3 Developer

Tabriiz — Remote | May 2025 – August 2025

- Contributed to a Web3 crowdfunding platform focused on tokenization of real-world Islamic projects.
- Developed smart contracts using Solidity.
- Integrated Web3.js, Ethers.js, Wagmi, and RainbowKit.
- Built blockchain-connected features using Next.js and Node.js.
- Participated in frontend and backend development of decentralized application features.

Full Stack Developer

CMLabs — Remote | March 2025 – May 2025

- Developed internal SEO and analytics tools using Laravel, React.js, PostgreSQL, and MySQL.
- Participated in full software development lifecycle from planning to deployment.
- Worked closely with product and development teams to build scalable internal solutions.
- Contributed to both frontend and backend development.

Web Developer Intern

GAOTek Inc. — Remote | February 2025 – April 2025

- Developed and maintained WordPress websites for international clients.
- Improved frontend user experience and website responsiveness.
- Worked with PHP, HTML, CSS, JavaScript, and WordPress customization.

PROJECTS

Dipa Core — Manufacturing ERP System

Internal manufacturing management platform developed for PT Dipa Pharmalab Intersains.

- Production management
- Operational dashboards
- Reporting system
- Inventory workflows
- Internal approval processes
- Department management
- Manufacturing data management

Tech Stack: Next.js, TypeScript, Laravel, Redis, REST API, MySQL

Dipa AI — Manufacturing AI Assistant

AI-powered assistant designed to help manufacturing operations by utilizing company operational data.

- Internal knowledge assistant
- Manufacturing information retrieval
- AI-assisted reporting
- Automated notifications
- Workflow automation
- Integration with operational systems

Tech Stack: Gemini API, n8n, Next.js, MySQL, Laravel, Webhook, Fonte WhatsApp integration

Criova ERP

AI-powered ERP business platform focused on automation, operational efficiency, and intelligent workflow systems.

- Full-stack development
- AI integration
- Workflow automation
- Business process optimization
- System architecture planning

Tech Stack: Next.js, TypeScript, Nest.js, PostgreSQL, n8n, Hermes agent, AI APIs | **Link:** criova.id

Criova Krayo AI Chatbot

AI-powered customer service and booking automation platform for service businesses.

- Customer onboarding automation
- Booking workflows
- WhatsApp-based interaction flow
- AI-assisted customer support
- Automated follow-up systems

Tech Stack: Nest.js, n8n, AI APIs, PostgreSQL, Next.js | **Link:** <https://criova.id/cuci-ac>

KIRO — Personal AI Operating System

AI-powered life operating system designed to help users understand, optimize, and improve their lives through intelligent analysis and behavioral tracking.

- Daily journaling and reflection
- Habit tracking
- Productivity analytics
- Financial tracking
- Burnout detection
- Goal management
- AI-generated insights and recommendations
- Life analytics dashboard

Tech Stack: Next.js, TypeScript, PostgreSQL, Prisma, Gemini API, TailwindCSS

Web3 Analysis Dashboard

AI-powered Web3 analytics dashboard with blockchain integrations.

- MetaMask authentication
- Cryptocurrency tracking
- AI-generated market insights
- Portfolio monitoring
- Web3 integrations

Tech Stack: Next.js, Solidity, Web3.js, Ethers.js | **Link:** <https://web3-analysis-dashboard.vercel.app/>

EDUCATION

SMK Ilman Nafiah — Cirebon, Indonesia

Computer and Network Engineering | July 2020 – May 2023

CERTIFICATIONS

Harisenin.com — Full Stack Web Developer Bootcamp

August 2024 – December 2024

Tech Stack: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Next.js

Certificate: bit.ly/FaathirFSD BATCH13 HARISENIN CERTIFICATE

Coding Studio — Fundamental Cyber Security

June 2024

Certificate: member.codingstudio.id/certificate/77F14E6635-77F13ED4A6-77E570D3D8

SKILLS

AI & Automation

AI Integration, OpenAI API, Gemini API, Claude, Prompt Engineering, Conversational AI, AI Assistants, Workflow Automation,

Hermes agent and n8n, Business Process Automation

Backend Development

Node.js, Express.js, NestJS, Laravel, REST API Development, PostgreSQL, MySQL, Prisma

Frontend Development

React.js, Next.js, TypeScript, JavaScript, HTML, CSS, TailwindCSS, Shadcn UI

DevOps & Infrastructure

Docker, Linux, VPS Deployment, Git, GitHub, Postman, Vercel

Blockchain & Web3

Solidity, Web3.js, Ethers.js, Wagmi, RainbowKit, MetaMask Integration

Other

System Design, ERP Development, Business Analysis, Technical Documentation, Problem Solving

Languages

Bahasa Indonesia (Native), English (Professional Working Proficiency)
